

FIRE ON A FERRY-BOAT

Blaze Bursts from a Vanload of Furniture

Women Panic-Stricken and Try to Jump Overboard.

Truck Run Into the River While Near the Pier.

A van load of furniture caught fire on board the Fulton Ferry boat Farragut, while she was en route from the East River, shortly before noon to-day.

There were nearly 100 passengers, including women and children, on board, and a panic ensued among the latter. It required the united efforts of half the crew to prevent the frenzied women from jumping over the gates and leaping into the river.

Meanwhile the Farragut with all its passengers was making for her berth at the foot of Fulton street, when the Farragut left her Brooklyn slip.

At 11.50 A. M. Just before leaving a load of furniture, drawn by two horses, went aboard. The team and the furniture were the property of the Chair Company, 141 Maiden lane, New York.

Robert Smith was the driver. As the furniture was being loaded, a fire broke out in the furniture van, and the driver, who was on the river, saw the flames and yelled "Fire." Simultaneously he fled the forward cabin, where the furniture was stored.

The fire, which was caused by a match, spread rapidly, and the furniture was consumed. The driver, who was on the river, saw the flames and yelled "Fire." Simultaneously he fled the forward cabin, where the furniture was stored.

EXPERTS FOR THE DEFENSE.

Prof. McVay and Witthaus Testify for Dr. Meyer.

Was Arsenic Put in Brandt's Body After His Death?

The counsel for the defense in the case of Dr. Henry C. F. Meyer, who is on trial for poisoning, before Recorder Smyth, in Part II of the Court of General Sessions, continued to call experts to-day to disprove the testimony given by the men of science called by the prosecution.

Dr. William McVay, Professor of Chemistry in the College of Physicians and Surgeons of Boston, came first. He is a member of all the pharmaceutical societies in the United States. Lawyer Dr. O'Sullivan examined him.

"Is it possible to tell whether arsenic has been placed in a body before or after death when the organs are examined some time after death?"

The expert deliberated a moment and then answered emphatically: "It is impossible."

Dr. O'Sullivan smiled at bringing out expert confirmation of his contention, as the defense has insisted right from the start that the arsenic was placed in the cadaver to make a strong case against Dr. Meyer. The defendant is charged with the murder of Dr. Brandt, who was killed by arsenic.

EX-GOV. PRICE MUST SETTLE.

Ordered to Pay the Government Draft His Creditors Attached.

Given Five Days' Time or the Prospect of Going to Jail Again.

TRENTON, N. J., May 15.—Chancellor McGill rendered an opinion this morning holding ex-Gov. Rodman M. Price guilty of contempt of court, and giving him five days in which to pay some \$10,000, which he received two years ago from the United States Government from the settlement of a California claim, and a draft for which had been attached by his creditors.

Price was ordered by the Court not to endorse the draft nor draw the money, but he did so and was afterwards held in contempt of court, from which he was released on \$10,000. The Chancellor's decision is that if he does not pay within five days he shall remain in the jail until he does.
